DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The groups and the claims they include are as follows.

Group I, claim(s) 1-8, 11 and 12 are drawn to a method for stabilizing a protein solution formulation or solution.

Group II, claims 9 and 10 is drawn to a storage container for holding a protein solution formulation.

Group III, claims 13-15 are drawn to a stabilized protein formulation.

Group IV, claims 16 and 17 are drawn to a method for suppressing the formulation of associated matter in a protein solution formulation use a magnetic field generator.

(a) An international or national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those invention involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the **CLAIMED INVENTIONS, CONSIDERED AS A WHOLE, MAKES OVER THE PRIOR ART.**

The inventions listed as Groups I-IV do not relate to a single general inventive

Art Unit: 1651

concept under PCT Rule 13.1 because the invention AS CLAIMED is known in the art, since group II reads on an NMR that is holding a protein sample, and thus no special technical feature unites these inventions in a category.

ELECTION OF SPECIES

In addition if Group I is elected, a further election of species must be made. This application contains claims containing the following patentably distinct species which are described below:

The applicant must elect ONE of each species listed.

The applicant must elect ONE species for a physiologically active protein selected from the group consisting of: an antibody, an enzyme, a cytokine, a hormone, or a hematopoietic factor.

If hematopoietic factor is elected as a physiologically active protein, an additional election of species must be made, selecting from the group consisting of: a erythropoietin or granulocyte colony-stimulating factor.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

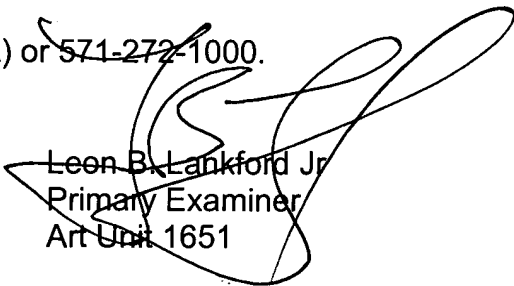

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thane Underdahl whose telephone number is (571) 272-9042. The examiner can normally be reached on 8:00 to 17:00.
